FAX NO:		EMAIL ADDRESS:	ntabundej@emalahleni.gov.za
POWER STATION:		ALL :	
COMMENTS/ISSUES / CONCERNS raised on the Draft Motivations and Atmospheric Impact Reports (Please use separate sheet, if required)			
Public participation process was not adequate. Venues selected for public participation as well as the times were inappropriate. The most vulnerable groups of the community of Emalahleni were not given opportunity			

to raise their concerns about the application.

Considering the consequences of this application, I will suggest that the consultation process should be all inclusive and reach out to all wards through various structures such as ward meetings, ward committees, churches and other community forums.

Venues can be requested from the local municipality.

Times for holding the consultative meetings should be during the day to afford opportunity to those who are available during the day.
