INVITATION TO PARTICIPATE IN A PUBLIC PARTICIPATION PROCESS

APPLICATION FOR POSTPONEMENT OF THE MINIMUM EMISSION STANDARDS COMPLIANCE TIMEFRAMES FOR ESKOM'S COAL AND LIQUID FUEL-FIRED POWER STATIONS IN MPUMALANGA HIGHVELD REGION, VAAL TRIANGLE AND THE CAPE REGION

Dear Interested and Affected Party,

Eskom operates a fleet of coal- and fuel-fired power stations across South Africa. The largest portion of Eskom's generation mix is coal-fired power stations concentrated in the Mpumalanga Highveld Region. A smaller portion of the fleet comprises nuclear, hydro, Open Cycle Gas Turbine (OCGT) and wind based load power stations elsewhere in the country.

The 2013 Minimum Emission Standards (MES) published under the National Environmental Management: Air Quality Act 39 of 2004 (NEM: AQA) requires that existing power stations must comply with 'existing plant' emission limits by 1 April 2015 and more stringent 'new plant' emission limits by 1 April 2020. The MES apply to Eskom's fleet of coal and liquid fuel-fired power stations which require compliance with the published emission limits within the defined legislative timeframe.

Due to various constraints it is not possible for many of Eskom's power stations to comply with the 2020 'new plant' limits. In some instances, it is also not possible for stations to comply with existing plant standards within the required timelines. Eskom is installing emission reduction equipment (retrofitting) in a phased approach to reduce emissions at its highest polluting stations. In cases where the stations will be unable to meet more stringent limits, Eskom is requesting postponement of the respective emission standards.

Eskom intends on applying for postponement of the MES for stations where the retrofits to reduce the emissions cannot be completed within the required timeframes, or in instances where stations cannot comply with the new plant MES at all. The latter is the case for stations where the costs and natural resources required to complete the retrofits by far outweigh the benefits of installing the technology given the station life expectancy, the state of the ambient air quality in the relevant airshed as well as relevant socio-economic factors.

The following power stations will apply for postponement:

- Lethabo Power Station in Vaal Triangle;
- Grootvlei-, Majuba-, Camden-, Kriel-, Matla-, Kendal-, Duvha-, Arnot-, Hendrina- and Komati and Tutuka Power Stations in the Mpumalanga Highveld Region;
- Acacia Power Station (Western Cape) and Port Rex Power Station (Eastern Cape) in the Cape Region.

The application will be supported by:

- a motivation for postponement,
- an Atmospheric Impact Assessment (AIR) considering the impact from the power stations on the ambient air quality; and
- a concluded Public Participation Process and a resulting report

Eskom appointed Naledzi Environmental Consultants CC as the independent environmental consultant, to prepare the AIR, manage the technical studies and conduct the public participation process.

The public participation process will entail two rounds of consultation. The first round will provide an opportunity to review a Background Information Document (BID) and to comment on the approach in preparing the application, including attendance of public meetings. During the second round the application itself, station specific AIRs and public consultation documentation will be made available for public review. A second round of public meetings, will be arranged at the same public venues as used for the first round of engagements. Dates for these engagements will be communicated to all registered interested and affected parties closer to the time but it is anticipated that these will take place in November 2018.

We herewith inform Interested and Affected Parties (I&APs) about the proposed application to solicit their views and comments on the application. This letter serves as notification thereof and we draw your attention to the following:

- An invitation to register as an Interested and Affected Party (I&AP)
- The availability of a BID for comment
- Notification of the first round of public meetings

REGISTER AS AN I&AP

You are hereby invited to register as I&AP and to participate in the application process by completing the enclosed Comments and Registration Form sheet included with the attached BID.

BACKGROUND INFORMATION DOCUMENT (BID) AVAILABLE FOR PUBLIC REVIEW

The enclosed BID provides details of the postponement application. It presents a brief overview of Eskom's reasoning for the postponement application and invites I&APs to participate and register on the application process. A period of 30 days, from 13 August - 11 September 2018, is provided to review the BID and submit comments and concerns regarding the postponement application.

The BID and associated Comment and Registration Form, is available for public comment in English, Afrikaans, IsiZulu, Sesotho, Xhosa, SiSwati on the Naledzi website at www.naledzi.co.za/publicdocuments. Copies of the BID are also available at the below tabled public venues:

A refresher as to how you can participate:

You may:

- Register as an I&APs on or before 11 September 2018

- Submit any comments/views on the project on the comments and registration form provided on or before 11 September 2018;
- Notify any other parties/stakeholders that you might be affected or interested in the project by encouraging them to register; and
- Attend any of the public meetings scheduled for the project

Please note that the details of the 2nd round of public engagement will be communicated to Interested and Affected Parties (I&APs) at a later stage.

Thank you in advance for your participation.

Sincerely,

Marissa Botha (*Pri.Sci.Nat*)
